

There is a new WEBI report in the W-2 Payments Data folder.

**1. WWP #15 Current Federal Clock/Payment Discrepancy Report - Monthly** -- This is a monthly report to coincide with the current reports WWP #10 & 11 Federal Clocks Not Matching W-2 Paid Months and will identify cases in which the Federal clock Tick and the Payment for any given month do not match. When a month with a mismatch is identified, the report will show the history of Federal clock/Playments over the last 12 months when there is history.

There is another new report but in the Work Programs Non-Participation folder.

**2. WP #104 Non-Participation Entered when no Activity is Open - Monthly** -- This is a monthly report (updated weekly) to show where there has been non-participation hours entered into CARES for an activity that was not open on that day on WPCH.

We also changed the path to get to the Job Access Loan (JAL) reports in Webi:
